

**Q.: What do I need to run the plugin „KCA - Random Numbers“ on my computer?**

A.: You will need at least CINEMA 4D Broadcast R16.

**Q.: Is there a trial version of this plug-in?**

A.: No, because it is a low cost plug-in there is no trial version nor .c4d file.

**Q.: Can I only create the shown „Matrix effect“ with this plug-in?**

A.: This plug-in generates animated sequences of random numbers. You can create the Matrix Effect but you are not limited to it. Since you are working native in CINEMA 4D, you can animate all of the given parameters (more under video tutorials or under „Products=> CINEMA 4D Broadcast=> User Interface), Use any font style, sequence horizontal/vertical, manipulate the length of the sequence & apply your very own material creations.

**Q.: Is the plug-in compatible with Mac?**

A.: Yes, you install it in your plug-ins folder and as long as you have CINEMA 4D Broadcast R16 you are good to go.
